

Adobe® Photoshop® CS2 One-On-One™ Companion Video Training DVD-ROM

Manual Installation Instructions for Deke's Keyboard Shortcuts and Color Settings

This document explains how to manually install the customized settings files Deke uses in the training. These files allow you to configure your copy of Photoshop CS2 like Deke's so you can follow along more easily.

Instructions:

- ❑ **If you haven't already done so, begin by downloading the patch from:**
www.totaltraining.com/supt/updates.asp?#pscs21on1

- ❑ **Install Deke's Keyboard Shortcuts:**
 - Make sure that Photoshop CS2 is not running. If the application is running, quit it now.
 - Locate the file "**Deke Keys CS2.kys**" in the patch folder that you downloaded from the website.
 - In the location on your hard drive where you installed Adobe Photoshop CS2, find the "**Keyboard Shortcuts**" folder.
(usually *C:\Program Files\Adobe\Photoshop CS2\Presets\Keyboard Shortcuts* on Windows, or *Macintosh HD:Applications:Adobe Photoshop CS2:Presets:Keyboard Shortcuts* on Macs).
 - Copy the file "**Deke Keys CS2.kys**" from the patch folder into the "**Keyboard Shortcuts**" folder.

- ❑ **Install Deke's Color Settings:**
 - Locate the file named "**Best workflow.csf**" in the patch folder that you downloaded.
 - On your hard drive, find the "**Settings**" folder,
C:\Program Files\Common Files\Adobe\Color\Settings (Windows) or
Macintosh HD: <username>:Library:Application Support:Adobe:Color:Settings (Mac)
 - Copy the file "**Best workflow.csf**" from the patch folder into the "**Settings**" folder.

- ❑ **Restart Adobe Photoshop CS2.** The custom settings should now be available as Deke describes them during the training.

If you have difficulty completing this manual installation, please consult the Total Training website at www.totaltraining.com/supt/updates.asp?#pscs21on1. Contact Total Training technical support via email at support@totaltraining.com, or by calling 760-517-9001.
